

Board Review No. 1 – First board review after 10 months in operation

Hanover (Germany), 27th April 2023 – On the 27th of April, we had our successful board review & pitch day! It was an exciting opportunity to showcase all the hard work we've been doing and receive valuable feedback from our board members.

During the board review, we presented our progress over the past quarter, including key metrics, achievements, and challenges to the steering committee and advisory board. Our steering committee provided strategic direction and oversight to ensure that we are aligned with BioIntelligence's goals and mission, while our advisory board played a crucial role in our pitch day, providing us with industry-specific insights and connections that helped us refine our strategy. Their contributions are instrumental in our success.

Then, we had our pitch day where our start-ups presented their milestones and progress. We were delighted to see the ideas and progress made so far.

Our diverse network of steering committee, advisory board, partners, and start-ups.

Overall, it was an incredible experience, and we are proud of our team's hard work and dedication. Looking forward to seeing how we can continue to grow and develop in the coming months. Thank you to our board members for their valuable feedback, and to our team for their tireless efforts in making this happen.

About BioIntelligence

BioIntelligence GmbH is a Hanover (Germany) - based incubator and innovation hub founded in 2022. As a subsidiary of BioDigit e.V., the company is dedicated to seamlessly bridging the gap between knowledge, startups and industry in biotechnology, life sciences and medical technology. In its first operational year, 4 of its startups have closed their first financing rounds. This is made possible through BioIntelligence Incubator, also referred to as High-Tech Incubator (HTI) BioIntelligence, one of the high-tech incubators funded by Lower Saxony's Ministry of Economics. With access to a strong network of experts & distinguished scientific institutions and companies, a laboratory & co-working space, as well as 200.000 € in equity-free grants (all within the framework of the "HTI" guidelines from the ministry), startups in the BioIntelligence ecosystem receive tailored guidance to their specific needs.

In parallel, BioIntelligence Innovation addresses the entrepreneurial challenges of corporate innovation. Through BioIntelligence Innovation, startups, investors, and companies are connected and the supported partners gain accessibility to masterclasses, workshops and startup scouting, as well as individualised analyses of internal innovation dynamics.
